## DETAILED ACTION

### *Remarks*

1. Applicant's arguments filed in the Appeal Brief dated October 4, 2004, have been found persuasive. Regarding independent claims 9, 12, 18 and 20, Applicant is correct in nothing that none of the prior art relied on in the rejections teaches or suggests forming rolling bearing elements from "Type 60 Nitinol" alloy as required. Independent claim 11 had previous been indicated as containing allowable subject matter. See Final Rejection dated January 30, 2004, ¶ 14.

2. Applicant properly perfected his priority through the PCT Application PCT/US00/22742, by amending the first sentence of the specification to include a reference to the prior applications, in a timely manner. See 37 C.F.R. § 1.78(a)(2)(ii)(C) ("The time periods in this paragraph [1.78(a)(2)(ii)] do not apply if the later-filed application is: ... A nonprovisional application which entered the national stage after compliance with 35 U.S.C. 371 from an international application filed under 35 U.S.C. 363 before November 29, 2000."). Applicant filed the PCT application on August 18, 2000 prior to November 29, 2000. Thus, the time periods of 1.78(a)(2)(ii) does not apply. The Final Rejection dated January 30, 2004, incorrectly indicated that Applicant had not properly perfected priority.
